

#### Guidelines to install PyQt4 on Mac:

01. download Qt 5.7.0 from [http://download.qt.io/official\\_releases/qt/5.7/5.7.0/qt-opensource-mac-x64-clang-5.7.0.dmg](http://download.qt.io/official_releases/qt/5.7/5.7.0/qt-opensource-mac-x64-clang-5.7.0.dmg)
02. download sip-4.18.1.tar.gz from <https://www.riverbankcomputing.com/software/sip/download>
03. download PyQt-mac-gpl-4.11.4.tar.gz from <https://www.riverbankcomputing.com/software/pyqt/download>
04. install Qt 5.7.0 by double click and follow its instructions.
04. copy sip-4.18.1.tar.gz and PyQt-mac-gpl-4.11.4.tar.gz to the directory where you want them to be installed.
05. cd to that directory
06. \$ tar xvf sip-4.18.1.tar.gz
07. \$ tar xvf PyQt-mac-gpl-4.11.4.tar.gz
08. \$ cd sip-4.18.1
09. \$ python3 configure.py
10. \$ make
11. \$ make install
12. \$ cd ../../PyQt-mac-gpl-4.11.4
13. \$ python3 configure-ng.py --qmake ~/Qt5.7.0/5.7/clang\_64/bin/qmake
14. \$ make
15. \$ make install
